Engineering Transparency in the news

GenAl Zürich 2024-05-29

Robert Caulk, PhD & Elin Törnquist, PhD

Director of Transparency

Team:

Timothy Pogue, Wagner Costa Santos, Emre Suzen

Our background

Emergent Methods www.emergentmethods.ai

Engineers and Researchers committed to FOSS

- Applying AI to real-time adaptive modeling challenges
- Scaling software in all directions
- Enriching data for other businesses
- Performing research

flowdapt

Real-time cluster orchestration https://flowdapt.ai

https://github.com/emergentmethods/datasieve

Modern configuration

https://github.com/emergentmethods/python-manifest

Demand transparent news.

AskNews

Why do we need to engineer transparency in the news?

Emergent Methods www.emergentmethods.ci

- Transparency Requirements:
 - Outlining news selection processes

https://artificialintelligenceact.eu/

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content
 - Observing copyright law

fulle of life

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content
 - Observing copyright law
 - Overseeing content generation with humans

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content
 - Observing copyright law
 - Overseeing content generation with humans
 - Documenting algorithmic practices

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content
 - Observing copyright law
 - Overseeing content generation with humans
 - Documenting algorithmic practices
 - Disclosing bias and funding sources

- Transparency Requirements:
 - Outlining news selection processes
 - Labeling AI generated content
 - Observing copyright law
 - Overseeing content generation with humans
 - Documenting algorithmic practices
 - Disclosing bias and funding sources

These are Insufficient!

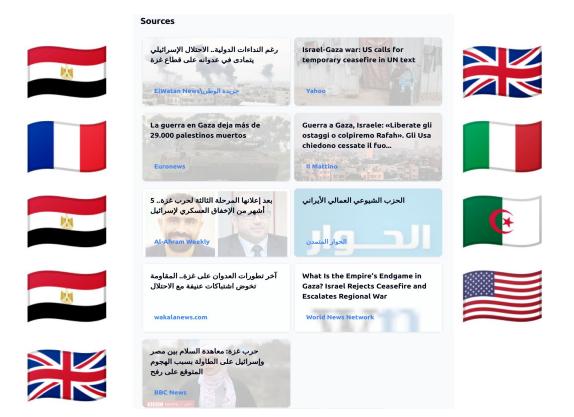

Beyond the EU AI Act

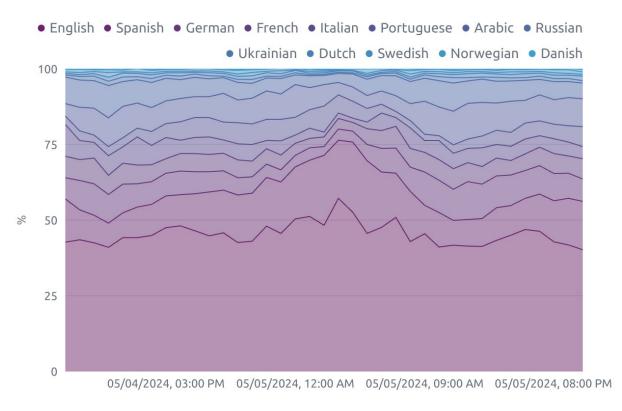

- Enforcing journalistic standards
 - Stating claims with supporting evidence and attribution
 - AP style-guidelines and formatting

- Enforcing journalistic standards
 - Stating claims with supporting evidence and attribution
 - AP style-guidelines and formatting
- Enforcing source and language diversity for democratized representation
 - Representing diverse perspectives on global issues

- Enforcing journalistic standards
 - Stating claims with supporting evidence and attribution
 - AP style-guidelines and formatting
- Enforcing source and language diversity for democratized representation

- Representing diverse perspectives on global issues
- Avoiding stale/outdated reporting
 - Missing the latest news can cause disinformation, customer dissatisfaction, and confusion

- Enforcing journalistic standards
 - Stating claims with supporting evidence and attribution
 - AP style-guidelines and formatting
- Enforcing source and language diversity for democratized representation

- Representing diverse perspectives on global issues
- Avoiding stale/outdated reporting
 - Missing the latest news can cause disinformation, customer dissatisfaction, and confusion
- Minimizing hallucination
 - The cost of hallucination is too high, a team of researchers is required

- Enforcing journalistic standards
 - Stating claims with supporting evidence and attribution
 - AP style-guidelines and formatting
- Enforcing source and language diversity for democratized representation

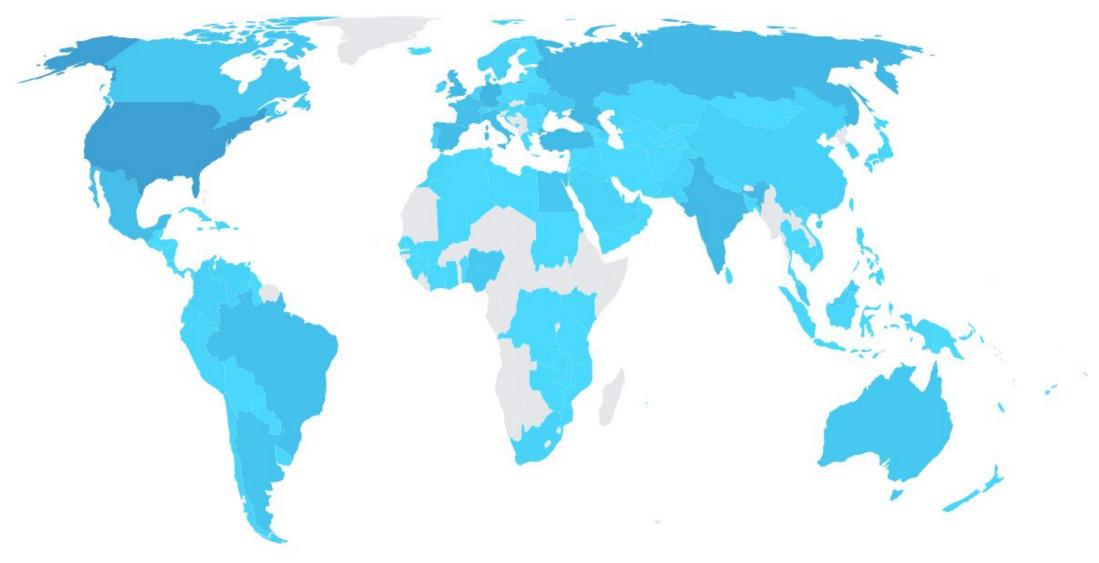

- Representing diverse perspectives on global issues
- Avoiding stale/outdated reporting
 - Missing the latest news can cause disinformation, customer dissatisfaction, and confusion
- Minimizing hallucination
 - The cost of hallucination is too high, a team of researchers is required
- Distributing EU Al Act compliant transparent news to companies and developers who are focused on their own LLM applications 🚀

Leveraging AskNews for context

Outsource your news context to AskNews

```
Blog article on Medium
from asknews import AskNewsSDK
ask = AskNewsSDK()
query = "The effect of President Xi's visit to France on the Russo-
Ukraine conflict"
news_context = ask.news.search_news(query).as_string
# Now run your Chat completion as usual:
system = {
    "role": "system",
    "content": f"A chat between a curious user and an artificial
intelligence Assistant. The Assistant has access to the following news
articles that may be useful for answering the User's questions:
{news_articles}"
response = oai.chat.completions.create(
    model="gpt-3.5-turbo",
    messages=[system, user]
print(response.choices[0].message.content)
```

 - 1 million articles per day
 - free academic use

- Highly parallelizable, highly scalable, industry grade
 - quantization = speed and cost savings
 - dense/sparse vectors = high flexibility
 - low-latency = non-optional in Al-first

- Highly configurable, cluster orchestration
 - scheduling adaptive AI/ML workflows
 - orchestrating services

Outsource your news context to AskNews

- Global coverage 300k articles per day
- Low-latency (100 ms) ready for tight spots in your LLM stack
- LangChain Tool and Retriever available
- SOTA custom entity extractor (<u>GLiNER-News</u>)
- Stories + clustering, Chat, Finance, Citation control
- Hot topic following/tracking/filtering
- Usage tracked pay for what you use
- Reddit perspective include social context
- Free news api https://my.asknews.app/plans
